## Teaching Style

I believe in education as the key to open our minds and become better human beings for the benefit of our community. It is my principal goal to mentor my students from a holistic paradigm, using academic resources to help them develop independent critical thinking, find their true passion, and become their best version. I work on personalized programs for my students according to their abilities and interests, in constant communication with their parents and guardians, and improving the experience with their feedback for a better understanding of their needs.

2nd step: Analyze the numerator
